

## How do I implement KidEntrepreneurship.com in my school?

- **The programs can be taught with or without a classroom teacher.**
  - Implementation options:
    - During school course
    - During school elective
    - After school course
    - After school club
    - Summer course
    - Week course
    - Weekend course
    - Take home course
    - Independent course
- Mobile and tablet friendly.
- *Digital Teacher Manuals* are provided.
- Teachers do not need an entrepreneurship background to teach the program.
- The programs can be part of a STEM curriculum.
  - The K-2, 3-5, and 6-8 programs have students create their own business idea. The school can encourage students to think of a STEM idea. After developing the business model of their STEM idea in our program, students can then build a prototype of their idea in their coding class or 3d printing class.
- When students present their business on the final day, schools are encouraged to invite parents to witness the value of the program.
